CONTENTS.

	Page.
FARMERS' BULLETIN No. 451.—EXPERIMENT STATION WORK, LXIII:	
Sterilizing tobacco seed beds	5
Steam sterilizing	5
Sterilization with formalin or formaldehyde	6
Conditions essential to clover growing	7
Curing clover hay	9
The velvet bean	10–15
Quality and conformation of draft horse	15–19
Care of brood mares and new-born foals	20
Management of the pregnant mares	20
Care of new-born foal	21
Navel and joint disease in the new-born foal	23
FARMERS' BULLETIN No. 452.—CAPONS AND CAPONIZING:	
Historical sketch	5
Description and characteristics of the capon	5
Selection of breeds	6
Time to caponize	7
Caponizing instruments	7
The operation of caponizing	9
Methods of holding the fowl	9
Details of the operation	10
Losses due to caponizing	11
Slips	12
Care of fowls after the operation	12
Feeding capons	13
Killing and dressing capons for market	13
Profits	14
FARMERS' BULLETIN No. 453.—DANGER OF GENERAL SPREAD OF THE GIPSY AND BROWN-TAIL MOTHS THROUGH IMPORTED NURSERY STOCK:	
Introduction	5
Importations of infested nursery stock of 1909–1911	5
Brown-tail moth nests imported in 1909	5
Brown-tail moth nests imported in 1910	6
Brown-tail moth nests imported in 1911	7
Records of distribution of the imported nursery stock incomplete	7
Conditions in the District of Columbia	8
Nature of inspection and likelihood of local infestation	9
Significance of importations of 1909–1911	10
Effect of the brown-tail moth on health	11
Character and value of imported nursery stock	12
European nursery conditions	12
Importation of refuse stock	14
Necessity of quarantine legislation	14
Brief descriptions of the different stages of the gipsy and brown-tail moths	15–22
FARMERS' BULLETIN No. 454.—A SUCCESSFUL NEW YORK FARM:	
Introduction	5
History of the farm	6
Organization of the farm	7
Drainage	9–12
Cropping system followed	12
Wheat	12
Clover	14
Potatoes	15
Live stock	21
Labor	22

FARMERS' BULLETIN No. 454.—A SUCCESSFUL NEW YORK FARM—Contd. Page.
The measure of successful farming ... 22
The farm income ... 22
Conditions of the farm ... 24
The home ... 24
The garden and orchard ... 25
The vegetable garden ... 25
Small fruits ... 26
The orchard ... 27
Flowers ... 28
The small-tool equipment ... 28
Summary ... 32
FARMERS' BULLETIN No. 455.—RED CLOVER:
Introduction ... 5
History and present distribution of red clover ... 6
Description of the red-clover plant ... 7
Adaptability of red clover to various soils and climates ... 8
Requirements for obtaining a stand of red clover ... 9
Choice of seed ... 9
Soils adapted to red clover ... 11
Preparation of the seed bed ... 12
Fertilizers for red clover ... 12
Seeding red clover ... 13
Use of nurse crops with red clover ... 16
Seeding without a nurse crop ... 18
Inoculation of red clover ... 18
Treatment the first season ... 19
Treatment second season ... 20
Need of experiments with red clover ... 20
Handling the red-clover crop ... 21
Red clover for ensilage ... 24
Red clover as a soiling crop ... 24
Red clover as a pasture ... 24
Red clover as a feed ... 25
Red clover in mixtures ... 26
Effect of red clover on the land ... 26
Red clover in rotations ... 27
Seed production of red clover ... 30
Handling clover for seed ... 30
Estimating the probable seed crop ... 32
Harvesting the red clover seed crop ... 32
Utilization of clover straw ... 33
Relation of pollinizing insects to the production of red clover seed ... 34
Varieties of red clover ... 34
Other species of clover compared with red clover ... 35
Enemies of red clover ... 37
Clover sickness ... 41
Restoring clover to its proper place in rotations ... 44
Red clover production in different sections of the United States ... 46
Summary and conclusions ... 47
FARMERS' BULLETIN No. 456.—OUR GROSBEAKS AND THEIR VALUE TO AGRICULTURE:
Introduction ... 7
Food habits ... 7
Means of preventing damage to crops by grosbeaks ... 12
How to attract and protect grosbeaks ... 13
Conclusion ... 14
FARMERS' BULLETIN No. 457.—EXPERIMENT STATION WORK, LXIV:
Low-grade fertilizers are expensive ... 5
Japanese cane for forage ... 8
Fighting the boll weevil by clean farming methods ... 11
Hastening maturity of cotton with fertilizers ... 14
The scuppernong as a profitable crop ... 15
Early spring lambs in the South ... 16
The production of sanitary milk ... 20
Lacto: A new and healthful frozen dairy product ... 21
A reenforced brick silo ... 23

FARMERS BULLETIN No. 458.—THE BEST TWO SWEET SORGHUMS FOR FORAGE: Page.
Introduction ... 5
Classification and varieties of sorghum ... 6
Sumac ... 6
Amber ... 7
Orange ... 7
Planter ... 7
Gooseneck ... 7
Honey ... 8
Sapling ... 8
The best two sweet sorghums and their growing area ... 8
Factors limiting the growth of sorghum ... 11–14
Growing the best forage yields of sorghum ... 14
Sorghum-cowpea mixture ... 17
When and how to harvest sorghum ... 19
Curing sorghum hay ... 19
Storing and feeding sorghum ... 20
Marketing the crop ... 21
Growing pure and improved seed of sorghum ... 21
Summary ... 23
FARMERS' BULLETIN No. 459.—HOUSE FLIES:
Introduction ... 5
Life history of the true house fly ... 7
Carriage of disease ... 9
Remedies and preventives ... 10
Natural enemies ... 15
What cities and towns can do ... 15
FARMERS' BULLETIN No. 460.—FRAMES AS A FACTOR IN TRUCK GROWING:
Introduction ... 9
Types of frames and their construction ... 10–13
Soil and fertilizers ... 14
Watering crops in frames ... 16
Temperature, ventilation, and protection of frames ... 17
Crops grown in frames ... 19–25
Prevention and control of diseases and insects ... 25
Marketing crops grown in frames ... 27
Summary ... 29
FARMERS' BULLETIN No. 461.—THE USE OF CONCRETE ON THE FARM:
Introduction ... 5
Selection of materials ... 5
Manufacture of concrete ... 9
Equipment for mixing concrete ... 12–18
Placing the concrete ... 18
Forms for concrete ... 21
FARMERS' BULLETIN No. 462.—THE UTILIZATION OF LOGGED-OFF LAND FOR PASTURE IN WESTERN OREGON AND WESTERN WASHINGTON:
Introduction ... 5
Extent of logged-off land ... 5
Utilization of logged-off land ... 6
Preparation of logged-off land for pasture ... 8
Pasture plants ... 10–14
Pasture mixtures ... 14
When to sow the seed ... 16
Management of the pasture ... 16
Winter feed ... 17
Stock to pasture ... 17
Summary ... 19
FARMERS' BULLETIN No. 463.—THE SANITARY PRIVY:
Soil pollution ... 7
Diseases spread from man by soil pollution ... 8
Human excrement as a breeding place for flies ... 12
Privy conditions on some American farms ... 13
Different kinds of privies ... 13–21
Directions for building a sanitary privy ... 21–29
Estimate of material for school or church privy ... 29
How to keep a privy sanitary ... 30
The privy at the country school and church ... 32
Civic responsibility in respect to privies ... 32

FARMERS' BULLETIN NO. 464.—THE ERADICATION OF QUACK GRASS: Page.
Introduction 5
The underground stems of quack grass 5
Types of quack grass land 6
Midsummer the best season to begin eradication 8
How to kill quack grass 9
FARMERS' BULLETIN NO. 465.—EXPERIMENT STATION WORK, LXV:
Cost of available nitrogen 5
Management of marsh soils 7
A weeder harrow for dry farms 9
The V-shaped cotton-stalk cutter 11
Storage for root crops 15
A danger in feeding root crops to breeding animals 16
Sanitary care of swine in the South 17
Individuality of the cow as a factor in economic milk production 20
Hatching and rearing turkeys by artificial methods 22
FARMERS' BULLETIN NO. 466.—WINTER EMMER:
Introduction 5
Use of incorrect names for emmer 5
Characteristics of emmer 6
Distribution of emmer 7
Cultivation of emmer in the United States 8
Introduction of winter emmer 9
Adaptation of winter emmer in the United States 10–16
Value of winter emmer as a field crop 16
Uses of winter emmer 17
Production of emmer in pounds of grain per acre as compared with other cereals 18
Chemical analyses 19
Cultivation of winter emmer 21
Use of winter emmer in wheat breeding 22
Summary 23
FARMERS' BULLETIN NO. 467.—THE CONTROL OF THE CHESTNUT-BARK DISEASE:
The disease 5
The control of the disease 10
Elimination and quarantine 10
The example in Pennsylvania 14
The protection of the Southern States 23
Summary 23
FARMERS' BULLETIN NO. 468.—FORESTRY IN NATURE STUDY:
Introduction 5
Outlines for a course of study 9
Twelve supplementary experiments 25
Suggestions for field trips 29
Suggestions for a forest calendar 32
Suggestions for a forest museum 33
Appendix 37
Supplementary reading books 37
Reference books for nature-study teachers 37
Key to common kinds of trees 39
FARMERS' BULLETIN NO. 469.—EXPERIMENT STATION WORK, LXVI:
Permanent lawns in the South 5
Fertilizing asparagus 7
Turnips for sheep 8
Loss of winter-fed lambs 9
Cost of market milk 10
Propagation of starters for butter making and cheese making 17
The plastered silo 19
FARMERS' BULLETIN NO. 470.—GAME LAWS FOR 1911:
Introduction 3
Legislation in 1911 3
Open seasons 15
Shipment of game 29
Sale 36
Limits 40
Licenses for hunting and shipping game 43

FARMERS' BULLETIN No. 471.—GRAPE PROPAGATION, PRUNING AND TRAINING: Page.
Introduction 5
Propagation of the grape 5
Soil and location 10
Description of the parts of a vine 10
Care and training of young vines 12
The pruning of bearing vines 15
Training and training systems 17
The principal grape regions of the United States 28
FARMERS' BULLETIN No. 472.—SYSTEMS OF FARMING IN CENTRAL NEW JERSEY:
Introduction 5
Cropping systems of central New Jersey 7
A successful tenant farm under the four-crop system 30
Summary 38
FARMERS' BULLETIN No. 473.—TUBERCULOSIS:
Nature of the disease 5
History 5
Importance 6
Symptoms 8
Post-mortem appearances 11
The tubercle bacillus 12
How the disease spreads 15
How a herd is infected 17
The tuberculin test 18
Protective inoculation 20
Suppression of the disease 20
Sanitation 22
FARMERS' BULLETIN No. 474.—THE USE OF PAINT ON THE FARM:
Introduction 5
Brushes and other implements 6
Care of brushes 7
Drying of paints 7
Preparation of surfaces for painting 9
Painting exterior woodwork 10
Interior painting 11
Painting of metal 12
Mixing paints 13
Composition of paints, and their cost 14
Whitewash 19
Calcimine 21
Precautions to be observed in painting 21
FARMERS' BULLETIN No. 475.—ICE HOUSES:
Introduction 5
The source of the ice supply 6
The principles of ice storage 6
The ice harvest 7
Types of ice houses, and their advantages 12
Construction of ice houses 13
Relation of the ice supply to fruit storage 14
Combined ice house and dairy 16
Combined ice house and refrigeration plant for the storage of farm products. 17
The construction of a refrigerator 18
The construction of an ice chest 19
Conclusion 20
